5. 我们的行动 **Our Actions**

风险评估与尽职调查

吉利控股集团致力于建立完善、透明、可追溯的供应链可持续管理体系。我们要求供应商尽最大努力提供零毁林产品，并通过开展针对性的供应商尽职调查，获取所需信息，与供应商携手共建无森林砍伐的供应链。

针对《欧盟零毁林法案》覆盖范围内的产品采购，集团将对签署合作协议的直接供应商开展体系化审查，并核验其提交的上游供应链尽职调查材料，识别并评估森林砍伐、森林退化及其他相关违法风险；依据风险等级设计针对性的差异化管理措施，致力于拓展供应商适用范围，逐步构建贯通全链路、覆盖全体供应商的零毁林管理体系。

Risk Assessment and Due Diligence

Geely Holding is committed to establishing a comprehensive, transparent and traceable sustainable supply chain management system. We require suppliers to endeavor to deliver deforestation-free products and conduct risk-based due diligence to obtain necessary information, collaborating with our suppliers to build a deforestation-free supply chain.

For product procurement covered by the EUDR, the Group will conduct systematic reviews of direct suppliers under signed cooperation agreements and verify the submitted due diligence documentation from their upstream supply chains to identify and assess risks of deforestation, forest degradation, and other related illegal activities. Based on the risk level, we are progressively expanding the scope of supplier coverage through targeted differentiated control measures, establishing an end-to-end anti-deforestation management system across all suppliers.

风险缓释与补救措施

吉利控股集团在开展业务时严格遵守项目所在国家或地区的环境及森林资源保护相关的法律法规，并将森林资源保护作为项目选址、建设和运营过程中的关键考量要素之一。针对可能出现的毁林风险，集团执行避免—减缓—恢复的减缓层级，倡导实践可持续的森林管理（如开展植树造林、森林修复和应用可持续的采伐技术），保护有限的森林资源。一旦识别到毁林风险，我们将采取措施降低毁林风险并实施补救措施。同时，若供应商所在区域或其采购行为存在一定毁林风险，我们将要求供应商限期整改，并在必要时提供协助及帮扶，共同降低毁林风险并实施补救措施缓解相关风险。

Risk Mitigation and Remediation Measures

Geely Holding strictly complies with applicable environmental and forest-resource conservation laws and regulations in the jurisdiction where it operates, and regards the forest-resource conservation as one of the key factors in our site selection, construction and operations process. For potential deforestation risks, the Group implements an Avoid-Mitigate-Restore mitigation hierarchy and advocates sustainable forest management practices—including afforestation, forest restoration, and sustainable harvesting techniques—to protect finite forest resources. Upon identifying deforestation risks, we will implement measures to reduce deforestation risks and execute remediation actions. Should a supplier's location or sourcing activities present deforestation risks, we will mandate the supplier to take time-bound corrective actions and provide necessary assistance and support to jointly mitigate risks and implement remedial measures.
